Crystal report 2008
Duration: 40 hours

Course Aims

Crystal Reports® 2008 enhances report building and report processing techniques with a slew of features that add value to your presentation. In this course, you will create a basic report by connecting to a database and modifying its presentation.

<p>Chapter 1:</p> <ul style="list-style-type: none"> -Getting Started with Crystal Report -Crystal Report Editions -Create Report Using Blank Report and Report Wizard -Report Layout <p>Chapter 2:</p> <ul style="list-style-type: none"> -More Tools in Crystal Report -Database Experts -Linking Multiple Tables -Database Fields -Formula Fields -SQL Server Expression Fields -Parameter Fields -Running Total Fields -Special Fields -Adding Summary information to your reports -Choosing between live and saved data <p>Chapter 3:</p> <ul style="list-style-type: none"> -Control Structure -Data Type/Declare Variable -Range Data Type -Array Data Type -If Then Else -Select Case -For Loop -While Do Loop -Do While Loop <p>Chapter 4:</p> <ul style="list-style-type: none"> -ToolBoxes and Format -Text Object -Picture Field -Hyperlink Field -Insert Box, Insert Line -Condition Formatting 	<p>Chapter 6:</p> <ul style="list-style-type: none"> -Working with Chart and Cross tab Object -Chart Type -Create Chart Using Chart Tool -Create Chart Using Wizard -Create Cross tab Report -Create Cross tab Report using Cross tab tool <p>Chapter 7:</p> <ul style="list-style-type: none"> -Create Sub Report -Create XML File -Create Report Using XML Data Source -Create Data Source -Export Report -Create Report from Excel, Access <p>Chapter 8:</p> <ul style="list-style-type: none"> -Build in Functions -Math -Summary -Financial -Strings -Date and Time -Date Ranges -Arrays -Ranges -Type Conversion <p>Chapter 9:</p> <ul style="list-style-type: none"> -Operators -Comparison Operators -Range Operators -Like Operators -In Operators -Other Operators <p>Chapter 10:</p> <ul style="list-style-type: none"> -Integration Crystal Report with VB 2005 -Using Crystal Report in VB 2005
--	--

<ul style="list-style-type: none">-Highlighting Expert Creates Emphasis-Raising a Red Flag with Report Alerts-Applying a template <p>Chapter 5:</p> <ul style="list-style-type: none">-Sorting and Group-Sorting Data-Grouping Data-Summarized Grouping Data-Subtotaling-Percentages-Group Header	<ul style="list-style-type: none">-Add Crystal Report References in VB 2005-Update Crystal Report Version in VB 2005-Using Parameter Report in VB 2005 <p>Chapter 11:</p> <ul style="list-style-type: none">-More Practices on Creating Report-More Practices in using report with VB.net
---	---

Set up of PCs for Training

PCs used for training should have the Microsoft Windows operating system, with Crystal Reports, Microsoft Office (with printer drivers for Print Preview) and Adobe Reader installed.
