

Contents

Oracle Database 11g Administration

Duration: 60 hr

Course Fee: 200 USD

Chapter 1: Introduction to Oracle11g

Chapter Objectives	2
The Role of the DBA	4
Oracle11g Memory and Process Architecture	7
Oracle Databases: The Big Picture	8
Background Processes: Summary	9
Oracle Instances vs. Oracle Databases	10
Instance–Database Relationship	11
Memory Structures	13
Processes	14
System Global Area (SGA)	15
Sizing the SGA: Buffer Cache	16
Sizing the SGA	18
Database Buffer Cache	19
Redo Log Buffer	20
Shared Pool	21
Shared Pool in a Dedicated (Standard) Server Configuration	22
Shared SQL Areas	23
Memory Use in the Shared Pool	24
Process Steps in the Execution of a SQL Statement	25
Result Cache	26
Sort Areas	27
Managing Memory in the PGA	28
Oracle Automatic Memory Management Modes	29
Oracle Database Memory Management—Parameters	30
Hierarchy for Automatic Memory Tuning	31
Setting Targets	32
Memory Management in OEM	33
Views to Monitor Automatic Memory Management	34
Hands-On Exercise 1.1: Understanding the Oracle Architecture	36
Database Writer (DBWR)	38
Buffer Management	39
Bringing New Data Into the Cache	41
Maintaining the Lists in the Buffer	42
Conditions That Activate Database Writer	43
Log Writer (LGWR)	44
Checkpoints	46
Managing Checkpoints	47
System Monitor (SMON)	49
Process Monitor (PMON)	50
Archiver (ARCH)	51
Additional Oracle Background Processes	52
User Processes	53
Hands-On Exercise 1.2: Getting Hold of Server Information	55

Chapter Summary.....	56
----------------------	----

Chapter 2: Starting Up and Shutting Down the Database

Chapter Objectives	2
Database Administration Facilities	4
Connecting as DBA.....	5
Connecting as SYSDBA to the Database.....	6
Connecting With DB Control (OEM).....	7
The Dashboard	8
Database Administration Passwords	9
Controlling Availability of a Database.....	12
Altering the Database States	13
Database Start-Up	14
Start-Up Options	15
Start-Up Examples.....	18
Shutting Down the Database	20
SHUTDOWN Options	21
Automatic Start-up	22
Checking the Database and ORACLE_SID Names.....	23
Hands-On Exercise 2.1: Starting Up and Shutting Down Oracle Databases	25
Chapter Summary.....	26

Chapter 3: Creating Databases

Chapter Objectives	2
Oracle11g Directory Structure on Windows (Simplified)	4
Creating a Database: Overview	5
Creating an Oracle Database: Tools Available	6
Pre-Creation Activities: Planning.....	7
Pre-Creation Activities: Parameter Files	8
DB_NAME.....	10
CONTROL_FILES	11
DB_BLOCK_SIZE.....	12
Sizing the Buffer Cache	13
The PROCESSES Parameter.....	14
Listing Parameter Values.....	15
Setting the Instance Identifier	17
Methods for Setting the Instance Identifier in Windows and Starting the Windows Services	18
Starting the Instance	19
Creating the Database	21
Creating a Database: Example	22
Database Creation Parameters	23
Database Creation Parameters: Specifying Limits.....	25
CREATE DATABASE Operations	26
Post-Creation Activities.....	27
Enabling Client Connectivity	29
Dropping Databases	31

Server Parameter Files	33
Using Server Parameter Files	34
Migrating to Server Parameter Files	35
Start-Up Behavior With Parameter Files	36
Managing Changes to Parameter Files.....	37
Hands-On Exercise 3.1: Creating an Oracle11g Database.....	39
Chapter Summary.....	40

Chapter 4: Oracle Data Dictionary and DBA Tools

Chapter Objectives	2
The Oracle Data Dictionary.....	4
Data Dictionary Construction	5
Standard Types of Dictionary Views	6
Accessing the Data Dictionary Views.....	7
The DESCRIBE Facility	8
The Dynamic Performance Views (v\$ Views).....	9
Utilizing the DICTIONARY View	10
Diagnostic File Structure—Trace and Alert Files	11
The Alert Log File.....	12
The Database Administration Tools.....	14
Oracle Enterprise Manager: General Issues.....	15
Enterprise Management: Three-Tier Architecture	16
Oracle Enterprise Manager.....	17
Enterprise Management Standalone Architecture: Database Control.....	19
Oracle Enterprise Manager: Database Control Screens	20
Advisor Central: Options	21
The Grid.....	22
The Grid: From an Oracle Viewpoint.....	23
Hands-On Exercise 4.1: Using the Graphical DBA Tools	25
Chapter Summary.....	26

Chapter 5: Managing Tablespaces and Datafiles

Chapter Objectives	2
Tablespaces and the DBA	4
Tablespaces and Operating-System Files	5
Tables and Tablespaces.....	6
Database Storage Relationships	7
Structure of Data Segments.....	8
Tablespaces: The Issues	9
Points to Consider.....	10
The SYSTEM Tablespace	11
The SYSAUX Tablespace	12
Creating Additional Tablespaces	13
Locally Managed Tablespaces	14
Bitmaps in Locally Managed Tablespaces.....	16
Tracking Free Space.....	17
Migrating a Dictionary-Managed SYSTEM Tablespace.....	18

Altering Tablespaces	21
The ALTER TABLESPACE Statement	22
Altering Tablespaces: Adding Datafiles	23
Altering Tablespaces: Relocating Files	24
Altering Tablespaces: Renaming	26
Altering Tablespaces: Online/Offline	27
Taking Tablespaces Offline: The Options	28
Dropping Tablespaces	29
Read-Only Tablespaces	30
Making a Tablespace READ ONLY	31
Creating a Read-Only Tablespace on a CD	32
Bigfile Tablespaces	33
Temporary Tablespaces	35
Temporary Tablespace Groups	38
Hands-On Exercise 5.1: Creating and Managing Tablespaces	40
Oracle Files	42
Database File Information	43
Resizable Datafiles	44
General Database Storage Patterns	46
Oracle-Managed Files	47
Deleting Data Files	48
Control Files	50
Redo Log Files	51
Hands-On Exercise 5.2: Working With Oracle Database Files	53
Chapter Summary	54

Chapter 6: Managing Undo Tablespaces

Chapter Objectives	2
Undo Tablespaces	4
Rollback Segments: Structure	5
Rollback Segment Usage	6
How Transactions Use Rollback Segments	7
Extent Usage in Rollback Segments	9
Moving the Head Into the Next Extent: Scenario 1	10
Moving the Head Into the Next Extent: Scenario 2	11
The “Snapshot Too Old” Error Message	12
System-Managed Undo Tablespaces: An Introduction	14
Using CREATE DATABASE to Build an Undo Tablespace	15
Adding Additional Undo Tablespaces to an Existing Database	16
Switching to an Alternative Undo Tablespace	17
Altering an Undo Tablespace	18
Managing Undo Tablespaces	19
Setting the Retention Period for Undo Data	20
Types of Extents in Undo Tablespaces	21
Extent Usage in Undo Tablespaces	22
Sizing the Undo Tablespace for the Retention Period	23
Maintaining Availability of Data for Retention Period	24
Retained Data: Space Requirements	25

Views Containing Information on Undo Space Usage	27
Undo Extent Usage.....	28
Using <code>v\$undostat</code> to Monitor Transaction Space Usage	29
Managing Rollback Segments	31
Hands-On Exercise 6.1: Managing Undo Tablespaces	32
Chapter Summary.....	33

Chapter 7: Managing Users and Their Resources

Chapter Objectives	2
Database Security.....	4
Authenticating Users.....	5
Operating-System Authentication	6
Creating and Setting Up Users	8
Creating a User: Example.....	9
Default Tablespaces for Users.....	10
Manipulating User Accounts	11
Case-Sensitive Passwords	12
Quotas on Tablespaces	13
Tablespace Quota Information.....	14
Controlling Tablespace Usage.....	15
Dropping Users.....	16
Profiles.....	18
Profile Specifications.....	20
DEFAULT Profile.....	21
Altering Profiles.....	22
Assigning Users to Profiles	23
Dropping Profiles	24
Activating Resource Limits.....	25
Profiles and Password Management	27
Profile Specifications for Password Management.....	28
Forcing Account Expiration	29
Password Complexity Verification.....	30
Information on Password Management	31
Monitoring Users and Sessions	33
Killing Sessions.....	34
Hands-On Exercise 7.1: Managing Users and Resources.....	36
Maintaining Privileges and Roles	38
System Privileges	39
Managing System Privileges.....	41
Object Privileges	43
Security of Tables	44
Granting Access to Tables.....	45
Object Privileges	46
Summary of Commonly Used Privileges on Objects.....	47
Granting Access to Objects: Some Examples	48
Useful Dictionary Views	49
Revoking Privileges	50
Revoking Object Privileges Granted With <code>GRANT OPTION</code>	51

Managing Privileges With Roles	53
Privilege Management	54
User and Application Roles.....	55
Creating and Granting Roles	57
Revoking Roles.....	58
Pre-Created Roles	59
Dictionary Information on Roles.....	60
Hands-On Exercise 7.2: Granting, Revoking, and Displaying System Privileges	62
Chapter Summary.....	63

Chapter 8: Space Management

Chapter Objectives	2
Managing Space: An Introduction	4
Database Storage Relationships	5
Storage Parameters for Segments.....	6
Sizing Extents	7
Large Extents.....	9
Initial Extents	10
Inserting New Rows.....	12
Data Block Space Utilization.....	13
Setting PCTFREE.....	14
Setting PCTFREE for Indexes.....	15
Automatic Segment Space Management (ASSM)	16
Regaining Free Space: Deallocating Extents.....	18
Deallocating Space	19
Regaining Free Space Below the High-Water Mark.....	20
The TRUNCATE TABLE Statement	21
Reorganizing Data Using Data Pump	22
ROWID	24
Procedures in DBMS_ROWID	26
Oracle Data Block Format.....	28
Block Header Organization	29
Row Storage	30
Storage Patterns for Datatypes.....	31
Hands-On Exercise 8.1: Space Management.....	34
Row Chaining and Row Migration.....	36
Detecting and Handling Row Migration.....	37
Eliminating Migrated Rows	38
Analyzing Objects	40
Gathering Statistics With dbms_stats	41
Hands-On Exercise 8.2: Chaining, Migration, and Reorganization	43
Compression: Characteristics	45
Compressing Table Data For Direct Load Operations	46
Table Data Compression	47
Table Data Compression for Direct Load Operations	48
Space Reduction Due to Compression	49
Predicting the Compression Factor.....	50

Compression Test.....	52
Compression Test—Compression Factors	54
Sorting the Data for Compression.....	55
Compressed Table Behavior	56
Compressing for OLTP Operations.....	58
OLTP Compression	59
Hands-On Exercise 8.3: Compressing Table Data	61
Reclaiming Space in Oracle10g.....	63
Repositioning of HWM During Shrinks.....	64
Shrinking Objects.....	65
Large Objects	67
LOB Types.....	68
Internal LOB Architecture.....	69
Declaring a LOB Column	71
LOB Storage Clause	72
Create the Instructor Table	73
Instructor Table Storage	74
LOB Read Consistency.....	76
LOB Restrictions	77

Hands-On Exercise 8.4: Shrinking Tables Online	79
Chapter Summary	80

Chapter 9: Partitioning Tables

Chapter Objectives	2
Very Large Databases	4
Partitions	5
Base Table vs. Partitions	6
The Need for Partitioned Tables	7
Range Partition Syntax	8
Range Partition Key	9
Range Partition Example	10
Defining Range Partitions	11
Partition Ranges	12
Partition Range Example	13
MAXVALUE Example	14
Storing Partitions	15
Partition "Base" Table	16
Partition Extended Table Names	17
Updating the Partition Key	18
Hands-On Exercise 9.1: Using Partitioned Tables	20
Indexes and Partitions	22
Index Types	23
Nonpartitioned Indexes	25
A Nonpartitioned Index for a Partitioned Table	26
Nonpartitioned Index Diagram	27
Local Partitioned Indexes	28
Local vs. Global Indexes	29
Local Index Example	32
How a Local Index Works	33
Prefixed vs. Nonprefixed Indexes	34
Nonprefixed Index: Example	36
How a Nonprefixed Local Index Works	37
Local Prefixed vs. Local Nonprefixed Indexes	38
Global Partitioned Indexes	39
Global Index Partitions	40
Global Index Syntax	41
Global Index Diagram	42
How a Global Index Works	43
Equi-Partitioning	44
Hands-On Exercise 9.2: Using Partitioned Indexes	46
Partitions in the Data Dictionary	48
Partition Key in the Data Dictionary	49
VALUES LESS THAN in the Data Dictionary	50
Index Unusable	51
Causes of INDEX UNUSABLE	52
Manually Forcing Indexes to Be INDEX UNUSABLE	53
Rebuilding INDEX UNUSABLE Indexes	54

Dropping a Partition	55
Example of Dropping a Partition	56
Adding a Partition.....	57
Example of Adding a Partition.....	58
Splitting a Range Partition	59
Example of Splitting a Range Partition.....	60
Merging Partitions	61
Exchanging a Partition With a Relational Table	62
Other Partitioning Commands.....	63
Hash Partitioning.....	65
List Partition Syntax	66
Managing List Partitions: Examples	67
Composite Partitioning.....	68
Composite Partitioning Example	69
Subpartitions: Dictionary Information	71
Reference Partitioning	72
Reference Partitioning Example	73
Interval Partitioning	74
Interval Management	75
Merging Partitions—Moving the Transition Point	76
Virtual Column Partitioning	77
Inserting Into Table With Virtual Columns.....	78
Benefits of Partitioning	80
Hands-On Exercise 9.3: Administering Partitions	83
Chapter Summary.....	84

Chapter 10: Managing Flashback Operations

Chapter Objectives	2
Flashback Features	4
Setting Up Flashback Queries	6
Setting Up Flashback Queries	7
Flashback Query Limitations.....	8
Flashback Row History	10
Flashback Transaction History.....	12
Flashback Transaction History: Scenario.....	13
Finding the Errant Transaction.....	14
Auditing the Transaction	15
Flashback Transaction (Transaction Backout).....	17
Flashback Transaction Requirements.....	18
<code>dbms_flashback.transaction_backout</code>	19
Flashback Transaction Controls.....	20
Backing Out Transactions.....	21
Flashback Table.....	23
Flashback Table Functionality	24
Using Flashback Table	25
Flashback Drop and the Recycle Bin.....	27
Managing Tables in the Recycle Bin.....	29
Purging and Restoring Objects in the Recycle Bin.....	30

Hands-On Exercise 10.1: Recovering Information Using Flashback Operations32
Chapter Summary33

Chapter 11: Course Summary

Course Summary2
